NEOED

LEARN

DEVELOP

A component of the Develop module, Learn provides a centralized **cloud-based employee training solution** with a library of courses and the ability to create custom content.

1600+ COURSES ON HAND – OR BUILD YOUR OWN

Ensure critical learning with thousands of general and education-specific courses. Have your own courses and quizzes? Easily add them or create new ones without any code-based knowledge.

- Streamline mandatory trainings like sexual harassment, Title IX, FERPA, and more
- Upload your own SCORM courses

- Convert docs, pdfs, videos, and presentation slides into courses and add quizzes to measure command of information

EASILY TRACK EMPLOYEE LEARNING

Keep employees informed of training requirements and due dates with automated notifications and reminders to increase engagement and improve completion rates.

- Assign courses to individuals, certain types of employees, entire departments, or all employees
- Create due dates that trigger automated email notifications and reminders

- Enable employees to complete training from anywhere with a mobile-friendly interface
- Set up reminders for license and certificate renewals

NURTURE EMPLOYEES THROUGH HARD AND SOFT SKILLS BUILDING

Cultivate growth and professional development for employees whether they're working remotely or on-campus.

- Increase participation and remove geographic obstacles with online training

- Ensure your staff and faculty receive the training they need to succeed

- Create opportunities for career development and increase retention

- Eliminate the need for in-person training or create a hybrid experience

"Besides making everything a lot easier, what I value most is that **NEOED listens to the users** *and implements our ideas."*

Janet Fager
Kankakee Community College
